Challenges

The client needed to map, optimize, and automate the student summer camp vetting and enrollment process to increase efficiency and reduce operational time and cost to perform this process on annual basis.

Optimum's Involvement

Optimum mapped the client's workflows, optimized them to accommodate future enhancements, and compiled student data from disparate systems.

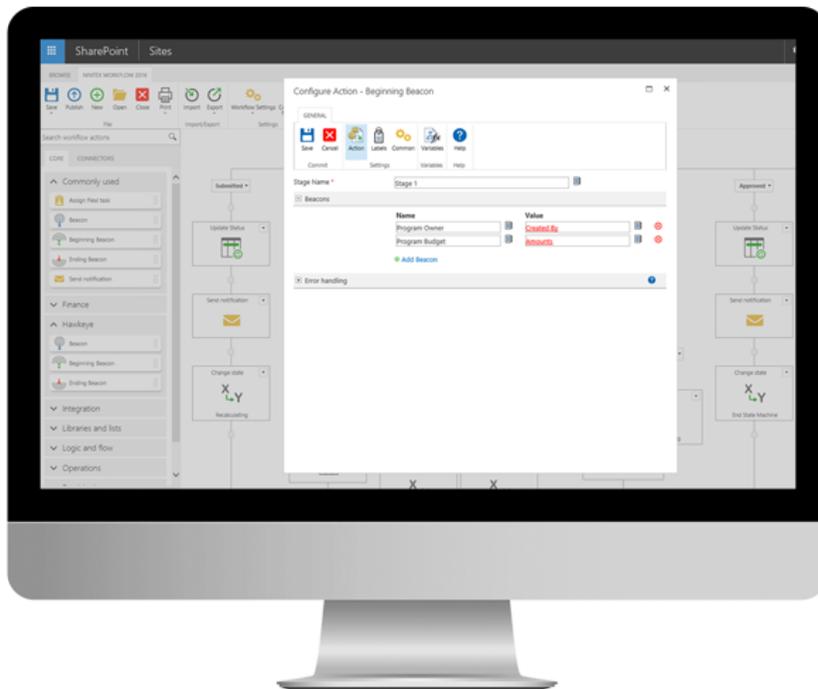

Optimum then utilized Office 365 and Nintex solutions to enable automated enrollment and vetting processes.

Deliverables

A single data compilation environment in SharePoint allowed for complex student vetting, list allocation, and enrollment.

Nintex's workflow automation created a more robust student summer camp enrollment process.

Optimum partners with Nintex to bring automation to school's summer camp enrollment process

The client's process for vetting and enrolling students into their educational summer camps was complex, involving timeframes and deadlines, fluid academic- and attendance-related student parameters, and dynamic movement of students from one list to another.

Optimum mapped and engineered the workflows required to automate the vetting and enrollment process, documenting and detailing approval workflows, notifications, and student-related metrics, and data systems of origin.

By utilizing SharePoint Online (in Office 365) and Nintex's workflow automation platform, Optimum automated the client's summer camp process by each individual grade and within each of the client's schools.

This automation greatly reduced email-based collaboration and manual review/approval processes and allowed for the viewing of near-real-time student performance data, list allocation, and camp enrollment status.

About Optimum

Optimum is a modern Software Solutions and Services firm, transforming businesses through the power of People, Technology, and Automated Processes.

By utilizing our expertise and experience in strategic planning, process optimization, and innovative technologies, our clients gain clarity and productivity, reduce operational and labor costs, ensure compliance, and enable business automation and transformation.

Optimum offers a full suite of software services and solutions, including Custom Software Design and Development, Business Advisory Services, Business Process Automation, Systems Integration, Business Intelligence and Analytics, Work Management and Collaboration Solutions, IT Project Management and Business Analysis, and Staff Augmentation. Learn more by visiting www.optimumcs.com.

About Nintex

Nintex is the global standard for process management and automation. Today more than 8,000 public and private sector clients across 90 countries turn to the Nintex Platform to accelerate progress on their digital transformation journeys by quickly and easily managing, automating and optimizing business processes. Learn more by visiting www.nintex.com and experience how Nintex and its global partner network are shaping the future of Intelligent Process Automation (IPA).
