

# Project Management software solution modernizes construction company

**Client engages Optimum to develop Portfolio visibility and business intelligence.**

### Organization

Stillo Construction

### Website

[www.stilloconstruction.com](http://www.stilloconstruction.com)

### Industry

Construction Services

### Country

United States

### Challenges

While the client struggled to maintain their overall portfolio visibility, communication between their customers and the construction Project Managers were cumbersome and lacked real-time relay.

### Optimum’s Involvement

Optimum’s Team educated the client in Project Management (PM) best practices, and also involved an automation partner to assist the client with portfolio visibility through software implementation.

### Deliverables

PM best practices were integrated into the automation software. Smartsheet’s software implementation allowed for increased process and portfolio visibility, and real-time external collaboration with the client’s customers.

# Optimum partners with Smartsheet to streamline construction projects and client communication

Optimum implemented a Cloud-based project management solution for the client using Smartsheet, helping them achieve their goals in better managing their projects, improving internal collaborations and client interactions, and gaining a competitive advantage in the market.

This was accomplished through the development of robust and scalable Smartsheet template designs and reporting dashboards, based on the client's project management needs and goals, to increase the user adoption, support the company's project-based growth, and facilitate better customer-PM collaboration.
